

Nextrials Co-Founder James H. Rogers Named to PharmaVOICE 100

Company President and CEO Recognized for Innovative Leadership and Industry Contributions

San Ramon, CA – June 26, 2007 – Nextrials, Inc., a leader in clinical research software and services, today announced that company co-founder, president and CEO James H. Rogers has been named to the PharmaVOICE 100 list in recognition of his long career of innovative contributions to the pharmaceutical and biotechnology industries. The PharmaVOICE 100 list annually showcases the greatest influencers impacting corporate leadership, research and development, technology, creativity, marketing and business strategies within the life sciences.

"We are pleased to recognize these 100 individuals, from all the different sectors of the life-sciences industry, who have been able to translate industry issues into opportunities and who have taken the time to mentor the next generation of leaders," said Taren Grom, editor and co-founder of PharmaVOICE. "The PharmaVOICE 100 are individuals who think outside the box, pioneer new paths to success, and inspire their colleagues in the industry through their unique leadership qualities."

For more than 25 years, Rogers has contributed to the advancement of the pharmaceutical industry through the development of information technology specifically designed for use in the clinical research setting. After working for companies such as Clinimetrics Research Associates, Xoma Corporation, Syntex, Inc. and SRI International, he co-founded Nextrials and helped it become a recognized leader in cost-effective, practical and reliable technology alternatives to traditional paper-based clinical trial management. He is an active member of many professional organizations, such as the Silicon Valley Association of Startup Entrepreneurs and the Drug Information Association, and is a frequent speaker at organizational meetings.

This is the third consecutive year that Nextrials has had an executive selected for the PharmaVOICE 100. Previous designees were company co-founders Robert F. Lyons in 2005 and Anthony J. Costello in 2006.

About the PharmaVOICE 100

PharmaVOICE asked its diverse readership to nominate the individuals who have inspired and motivated them. Readers were asked to select individuals who view industry trends as challenges, not burdens, as opportunities not obstacles, who embody panache and conviction, and who plan for the future rather than respond to change.

The 2007 PharmaVOICE 100 were selected based on a number of criteria, particularly the nominator's description of why an individual inspired or motivated them or affected positive change, in addition to the number of submissions received.

About Nextrials, Inc.

Founded by pharmaceutical researchers in 1999, Nextrials Innovates for Life™ by offering today's most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism®, its award-winning Electronic Data Capture (EDC) solution, has been used at over 500 research sites to streamline the initiation and management of clinical trials. The company is headquartered in the San Francisco Bay area. For more information, visit www.nextrials.com or call 925-355-3000. A podcast by co-founder Anthony J. Costello on innovative technologies for clinical research is also available at <http://pharmavoices.com/podcasts>.
