

Nextrials Expands Executive Team, Promotes Alan Arroyo to Vice President of Global Sales and Marketing

San Ramon, CA – June 3, 2009 – Nextrials, Inc. (www.nextrials.com), a leader in clinical research software and services, today announced the promotion of Alan Arroyo to vice president of global sales and marketing. With over 12 years of clinical research and business development experience within the pharmaceutical industry, Arroyo's addition to the executive team enables the company to better leverage its industry leadership in the movement to deliver true integration of electronic data capture (EDC) technology with platforms used to create and manage electronic health records (EHR).

"Alan is a multi-talented individual who has already helped push the adoption of our clinical trial data management platform, Prism®, by championing features our customers want, such as ad hoc reporting and a new dashboard interface," noted James Rogers, CEO and co-founder of Nextrials. "His strong ties to the industry and his background in clinical trials fit well with our goal: to deliver to our customers new features and tools for Prism that improve the process of initiating, managing and analyzing the results of clinical trials. This includes our present initiative of integrating Prism with electronic health records used in the healthcare setting."

Arroyo had previously been a senior director of business development for Nextrials. Before joining the company in 2007, he was the associate director of clinical operations at Novacea, with operational responsibility for the company's DN-101 global drug development program. His pharmaceutical experience also includes positions with Cerus Corporation, Chiron Corporation and Covance. During his career, he has accumulated over seven years of e-clinical experience on multiple platforms. He is a graduate of the University of California at Berkeley.

Arroyo now joins Michelle Dockhorn, senior vice president of strategic business development, in managing Nextrials' sales efforts. Along with other Nextrials executives,

he will be in Booth 1302 at the 45th Annual Meeting of the Drug Information Association, being held at the San Diego (CA) Convention Center June 21-25.

About Nextrials

Founded by pharmaceutical researchers in 1999, Nextrials offers today's most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism[®], its award-winning Electronic Data Capture (EDC) solution, has been used at over 1,200 research sites to streamline the initiation and management of clinical trials. The company is headquartered in the San Francisco Bay area. For more information, visit www.nextrials.com or call 925-355-3000. A podcast by co-founder and CEO James Rogers on the incorporation of electronic health records into the clinical trial process is also available at <http://pharmavoices.com/podcasts>.
