Nextrials Attends its 7th Consecutive Connectathon to Demonstrate its E2E, its EHR Integration Tool

Once again, Nextrials is the only eClinical vendor to support Connectathon 2015 validation of EHR integration standards for clinical research.

San Ramon, CA and Cleveland (IHE North America Connectathon) – January 26, 2015 – Nextrials, Inc. (www.nextrials.com), a leader in clinical research software and services, will participate for the 7th consecutive time in the annual IHE North America Connectathon sponsored by IHE (Integrating the Healthcare Enterprise), to be held January 26th – 30th at the Cleveland Convention Center and HIMMS Innovation Center. This is the first time the conference has been held at the new HIMMSS Innovation Center. Nextrials is the only electronic data capture (EDC) vendor to support live data streaming between electronic health records (EHR) and clinical research systems.

Nextrials will demonstrate and validate the use of E2E™ , its integration tool, coupled with Prism® its award-winning EDC platform. During the Connectathon demonstration, E2E will facilitate live data streaming between multiple EHR vendors and data recipients and will be testing the following profiles and/or standards:

- • - Clinical Research Document (CRD)
- • - Drug Safety Content (DSC)
- • - Audit Trail and Node Authentication (ATNA)
- • - Cross Enterprise User Assertion (XUA)
- • - Consistent Time (CT)

Connectathon is the healthcare IT industry's only large-scale interoperability testing event dedicated to establishing standards that address specific clinical needs in support of optimal patient care. The event is an important qualifier for the HIMSS15 Interoperability Showcase™ being held in Chicago, April 12-15, 2015.

"Nextrials is proud to demonstrate our ability to share healthcare data and prove it's utility for clinical research," said James Rogers, CEO and co-founder of Nextrials. "Connectathon allows us to work closely with many EHR vendors to improve the way out systems communicate and enhance our integration tool."

About Nextrials

Founded by pharmaceutical researchers in 1999, Nextrials offers today's most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism®, its award-winning Electronic Data Capture (EDC) solution, has been used at over 1,500 research sites to streamline the initiation and management of clinical trials. With its E2E integration tool, Nextrials has achieved the status of Registered

Solutions Provider with the Clinical Data Interchange Standards Consortium (CDISC) for EHR integration. The company is headquartered in the San Francisco Bay area. For more information, visit www.nextrials.com or call 925-355-3000.
