

## **Nextrials to Share Experiences from Early Implementation of EHR Integration for Clinical Research**

*Nextrials provides insights gained from its pioneering work in EHR integration*

**San Diego (DIA 2014 Annual Meeting, Booth 1044) and San Ramon, CA – June 14, 2014** – [Nextrials, Inc.](#), a leader in clinical research software and services, will be participating in an education session which explores the use of EHR integration for clinical trials. The presentation is entitled, “Real World Considerations for the Implementation of CDISC-Based EHR Integration.” James Rogers, CEO and co-founder of Nextrials, will present insights gained from pilots and early implementation efforts around the use of EHRs for clinical data collection.

This 50<sup>th</sup> Meeting of the [Drug Information Association](#) is being held June 15-19 at the San Diego Convention Center. Visitors can see live demonstrations of Nextrials [E2E™](#) integration tool and [Prism®](#) EDC systems at Booth 1044.

“People have been working on the EHR integration standards for years,” said James Rogers. “CDISC and IHE have laid the foundation with a set of standards that respect the function and limitations of healthcare and life sciences IT. These standards have been vetted with the FDA and Nextrials is a participant, contributor and strong supporter of these standards. I look forward to sharing our experiences gleaned from putting these standards into action.”

As an early supporter of the integration of healthcare and the life sciences, Nextrials has been an important contributor to the standards underlying the technology. Nextrials is the only eClinical vendor to complete 6 years of testing, validation and demonstration of these standards at Connectathon and HIMSS conferences.

### **About Nextrials**

Founded by pharmaceutical researchers in 1999, Nextrials offers today’s most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism®, its award-winning Electronic Data Capture (EDC) solution, has been used at over 1,500 research sites to streamline the initiation and management of clinical trials. With its E2E integration tool, Nextrials has achieved the status of Registered Solutions Provider with the Clinical Data Interchange Standards Consortium (CDISC) for EHR integration. The company is headquartered in the San Francisco Bay area. For more information, visit [www.nextrials.com](http://www.nextrials.com) or call 925-355-3000.
