

Nextrials Demonstrates Patient Enrollment and Data Collection Entirely from Within EHR System

The ability of Nextrials E2E™ integration tool to facilitate clinical research will be demonstrated at the HIMSS14 Interoperability Showcase™

San Ramon, CA and Orlando (HIMSS 2014) – February 23, 2014 – Nextrials, Inc. (www.nextrials.com), a leader in clinical research software and services, will demonstrate the interoperability of its Prism® Electronic Data Capture (EDC) platform and E2E™ integration tool with electronic health records (EHR) at the [2014 Annual Healthcare Information and Management Systems Society \(HIMSS\) Conference and Exhibition](#).

This year, the InterOperability Showcase is employing multiple true-to-life scenarios to demonstrate how healthcare providers can share information to improve patient care. Nextrials is participating in a profile that follows an oncology patient who is seeking treatment and enrolls in a clinical trial. Other participants in the scenario include Epic and GE.

“Interoperability and data exchange is gaining momentum throughout the healthcare enterprise,” said James Rogers, CEO and co-founder of Nextrials. “Nextrials believes the life sciences can harness this growing capacity to improve how the industry conducts clinical research and the InterOperability Showcase is a great venue to demonstrate this potential.”

This is Nextrials’ sixth consecutive appearance at the HIMSS Interoperability Showcase and Conference, being held February 23-27, 2014 at the Orlando Convention Center. Visitors to the showcase can see live demos of [Prism](#) and [E2E](#) seamlessly exchanging data with other healthcare providers and EHR systems.

About Nextrials

Founded by pharmaceutical researchers in 1999, Nextrials offers today’s most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism®, its award-winning Electronic Data Capture (EDC) solution, has been used at over 1,500 research sites to streamline the initiation and management of clinical trials. With its E2E integration tool, Nextrials has achieved the status of Registered Solutions Provider with the Clinical Data Interchange Standards Consortium (CDISC) for EHR integration. The company is headquartered in the San Francisco Bay area. For more information, visit www.nextrials.com or call 925-355-3000.
