

NextTrials Demonstrates Integration of Healthcare and Clinical Research

The seamless integration of clinical research with routine healthcare will be demonstrated at the HIMSS15 Interoperability Showcase™

San Ramon, CA and Chicago (HIMSS 2015) – April 12, 2015 – NextTrials, Inc.

(www.nexttrials.com), a leader in clinical research software and services, will demonstrate the interoperability of its Prism® Electronic Data Capture (EDC) platform and E2E™ integration tool with electronic health records (EHR) at the [2015 Annual Healthcare Information and Management Systems Society \(HIMSS\) Conference and Exhibition](#).

Once again, the InterOperability Showcase is employing realistic scenarios to demonstrate how the sharing of medical information can improve patient care. NextTrials is part of a profile that follows a patient being treated for cancer. As part of her care, she is identified as a potential patient for a clinical trial. Using the NextTrials E2E integration tool, she is enrolled in the study and data is auto-populated into NextTrials Prims EDC system. In addition, she is also entered into an oncology registry. Other participants in the scenario include Epic and the CDC.

“People have come to accept that clinical research is an important component of healthcare,” said James Rogers, CEO and co-founder of NextTrials. “It is important to be able to seamlessly incorporate clinical trials into a patient’s treatment plan. Given the advancements in healthcare interoperability, this is now possible using tools like NextTrials E2E integration tool.”

This is NextTrials’ seventh consecutive appearance at the HIMSS Interoperability Showcase and Conference, being held April 12-15, 2015 at the Chicago Convention Center. Attendees can see live demos of [Prism](#) and [E2E](#) seamlessly exchanging data with other healthcare entities and EHR systems.

About NextTrials

Founded by pharmaceutical researchers in 1999, NextTrials offers today’s most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism®, its award-winning Electronic Data Capture (EDC) solution, has been used at over 1,500 research sites to streamline the initiation and management of clinical trials. With its E2E integration tool, NextTrials has achieved the status of Registered Solutions Provider with the Clinical Data Interchange Standards Consortium (CDISC) for EHR integration. The company is headquartered in the San Francisco Bay area. For more information, visit www.nexttrials.com or call 925-355-3000.
