Nextrials Selected to Replace Vendor for Large Registry Study

Nextrials was awarded a contract to replace an existing EDC vendor and provide ongoing software and services

San Ramon, CA – October 30, 2014 – Nextrials, Inc., a leader in clinical research software and services, was selected to replace an existing eClinical vendor for a large ongoing registry study.

Nextrials was founded in 1999 and is known for its robust software, helpful 24 X 7 in-house software support and responsive services driven by experienced project managers.

"The eClinical vendor marketplace is complex with large variations is size and quality," said James Rogers, CEO and co-founder of Nextrials. "Large life science companies typically choose large vendors. It's the old, "Nobody gets fired for buying IBM". But large vendors are not a good fit for small and mid-sized biopharma and device companies. They need a partner who is cost effective and responsive to their needs. The company that picked us was not happy with the high costs and poor service provided by their large eClinical vendor. Nextrials was able to quickly migrate the legacy data, train the sites and launch the study using Prism in the protocol-mandated interval between treatment cohorts."

Nextrials has earned a strong reputation for quality software and services that are priced for the small and mid-sized life sciences companies. Additionally, clients benefit from the vast experience of Nextrials project managers who average 20 years of industry experience and over 10 years of EDC proficiency.

About Nextrials

Founded by pharmaceutical researchers in 1999, Nextrials offers today's most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism®, its award-winning Electronic Data Capture (EDC) solution, has been used at over 1,500 research sites to streamline the initiation and management of clinical trials. With its E2E integration tool, Nextrials has achieved the status of Registered Solutions Provider with the Clinical Data Interchange Standards Consortium (CDISC) for EHR integration. The company is headquartered in the San Francisco Bay area. For more information, visit www.nextrials.com or call 925-355-3000.
