

## **Nextrials to Demonstrate Enhancements to EHR Integration Tool at SCDM Conference**

*Nextrials E2E™ has enhanced features that make it more than just a data collection tool.*

**Las Vegas (SCDM 2014 Annual Meeting, Booth 113) and San Ramon, CA – September 28th, 2014** – [Nextrials, Inc.](#), a leader in clinical research software and services, will be sharing recent enhancements to their integration tool that accommodate the less-than-perfect world of repurposing healthcare data for clinical trials.

This 20<sup>th</sup> Meeting of the [Society for Clinical Data Management](#) is being held September 28<sup>th</sup> – October 1st at the JW Marriot in Las Vegas. Visitors can see live demonstrations of Nextrials [E2E™](#) integration tool and [Prism®](#) EDC systems at Booth 113.

"You can't just plug healthcare data directly into a clinical trial database," said James Rogers, CEO and co-founder of Nextrials. "Where the problem used to be too little data, the issue now is too much healthcare data. You need systems that allow you to filter and select which data is appropriate to enter into the research database. Nextrials E2E tool allows users to filter and select from a large set of pre-population data. It also allows users to manage disparities in data and resolve manual and auto-generated queries. "

Nextrials has been an important contributor to the EHR integration standards developed by CDISC and IHE. Nextrials is the only eClinical vendor to have completed 6 years of testing, validation and demonstration of these standards at Connectathon, HIMSS and other life sciences conferences.

### **About Nextrials**

Founded by pharmaceutical researchers in 1999, Nextrials offers today's most novel products and services for speeding the delivery of life-saving drugs and medical devices to market. Prism®, its award-winning Electronic Data Capture (EDC) solution, has been used at over 1,500 research sites to streamline the initiation and management of clinical trials. With its E2E integration tool, Nextrials has achieved the status of Registered Solutions Provider with the Clinical Data Interchange Standards Consortium (CDISC) for EHR integration. The company is headquartered in the San Francisco Bay area. For more information, visit [www.nextrials.com](http://www.nextrials.com) or call 925-355-3000.
